

The GP model with your trusted doctor: EGK Care

Under the EGK-Care basic insurance model, EGK-Gesundheitskasse works with various general practitioners and GP networks. This means that you receive personal support and can save costs.

Your advantages:

- Your GP is the person you trust
- One point of contact for all health concerns
- Your GP coordinates your further treatment path and saves you time and hassle
- An advantageous bonus

How EGK Care works:

Your GP is your first point of contact for health issues

Key points in brief:

- **The choice is yours:** You choose your local GP from the list of EGK doctors (egk.arztmap.ch).
- **Trusted contact person:** Your GP is your first point of contact for health problems or medical requirements.
- **Total treatment:** Your GP coordinates the entire treatment process and, if necessary, refers you to a specialist.
- **Confirmation of referral:** For all treatment by a specialist, therapist or hospital, you need a referral from your GP.
- **Emergency situation:** In an emergency, contact the emergency doctor.
- **Go directly to certain specialists without a referral:**
 - Gynaecologists (health checks)
 - Ophthalmologists (health checks)
 - Dentists
 - Paediatricians for children up to the age of 12
